

JINGZHANG OPEN STACK

ONE SPINE • THREE STACKS • TWO WINGS • TWELVE INTERFACES

JZ • OS

OPEN CITY STACK

A city is not a one-time product. It is a set of public interfaces that can be reviewed, rolled back, and maintained together.

LIVING

PROVISIONAL CONCEPT • FOR OPEN CALL, SELF-CHECK, AND DESIGN DISCUSSION ONLY

DESIGN CLAIM

The city is a maintainable open stack: interfaces are reviewable, decisions traceable, and scenarios stoppable.

SPATIAL MODEL

One spine links culture and mobility; three stacks specialize in validation, transfer, and services.

THREE LEVELS

43.6 km<sup>2</sup> coordinates industry, 11.4 km<sup>2</sup> structures renewal, and 368.4 ha tests prototypes.

DATA BOUNDARY

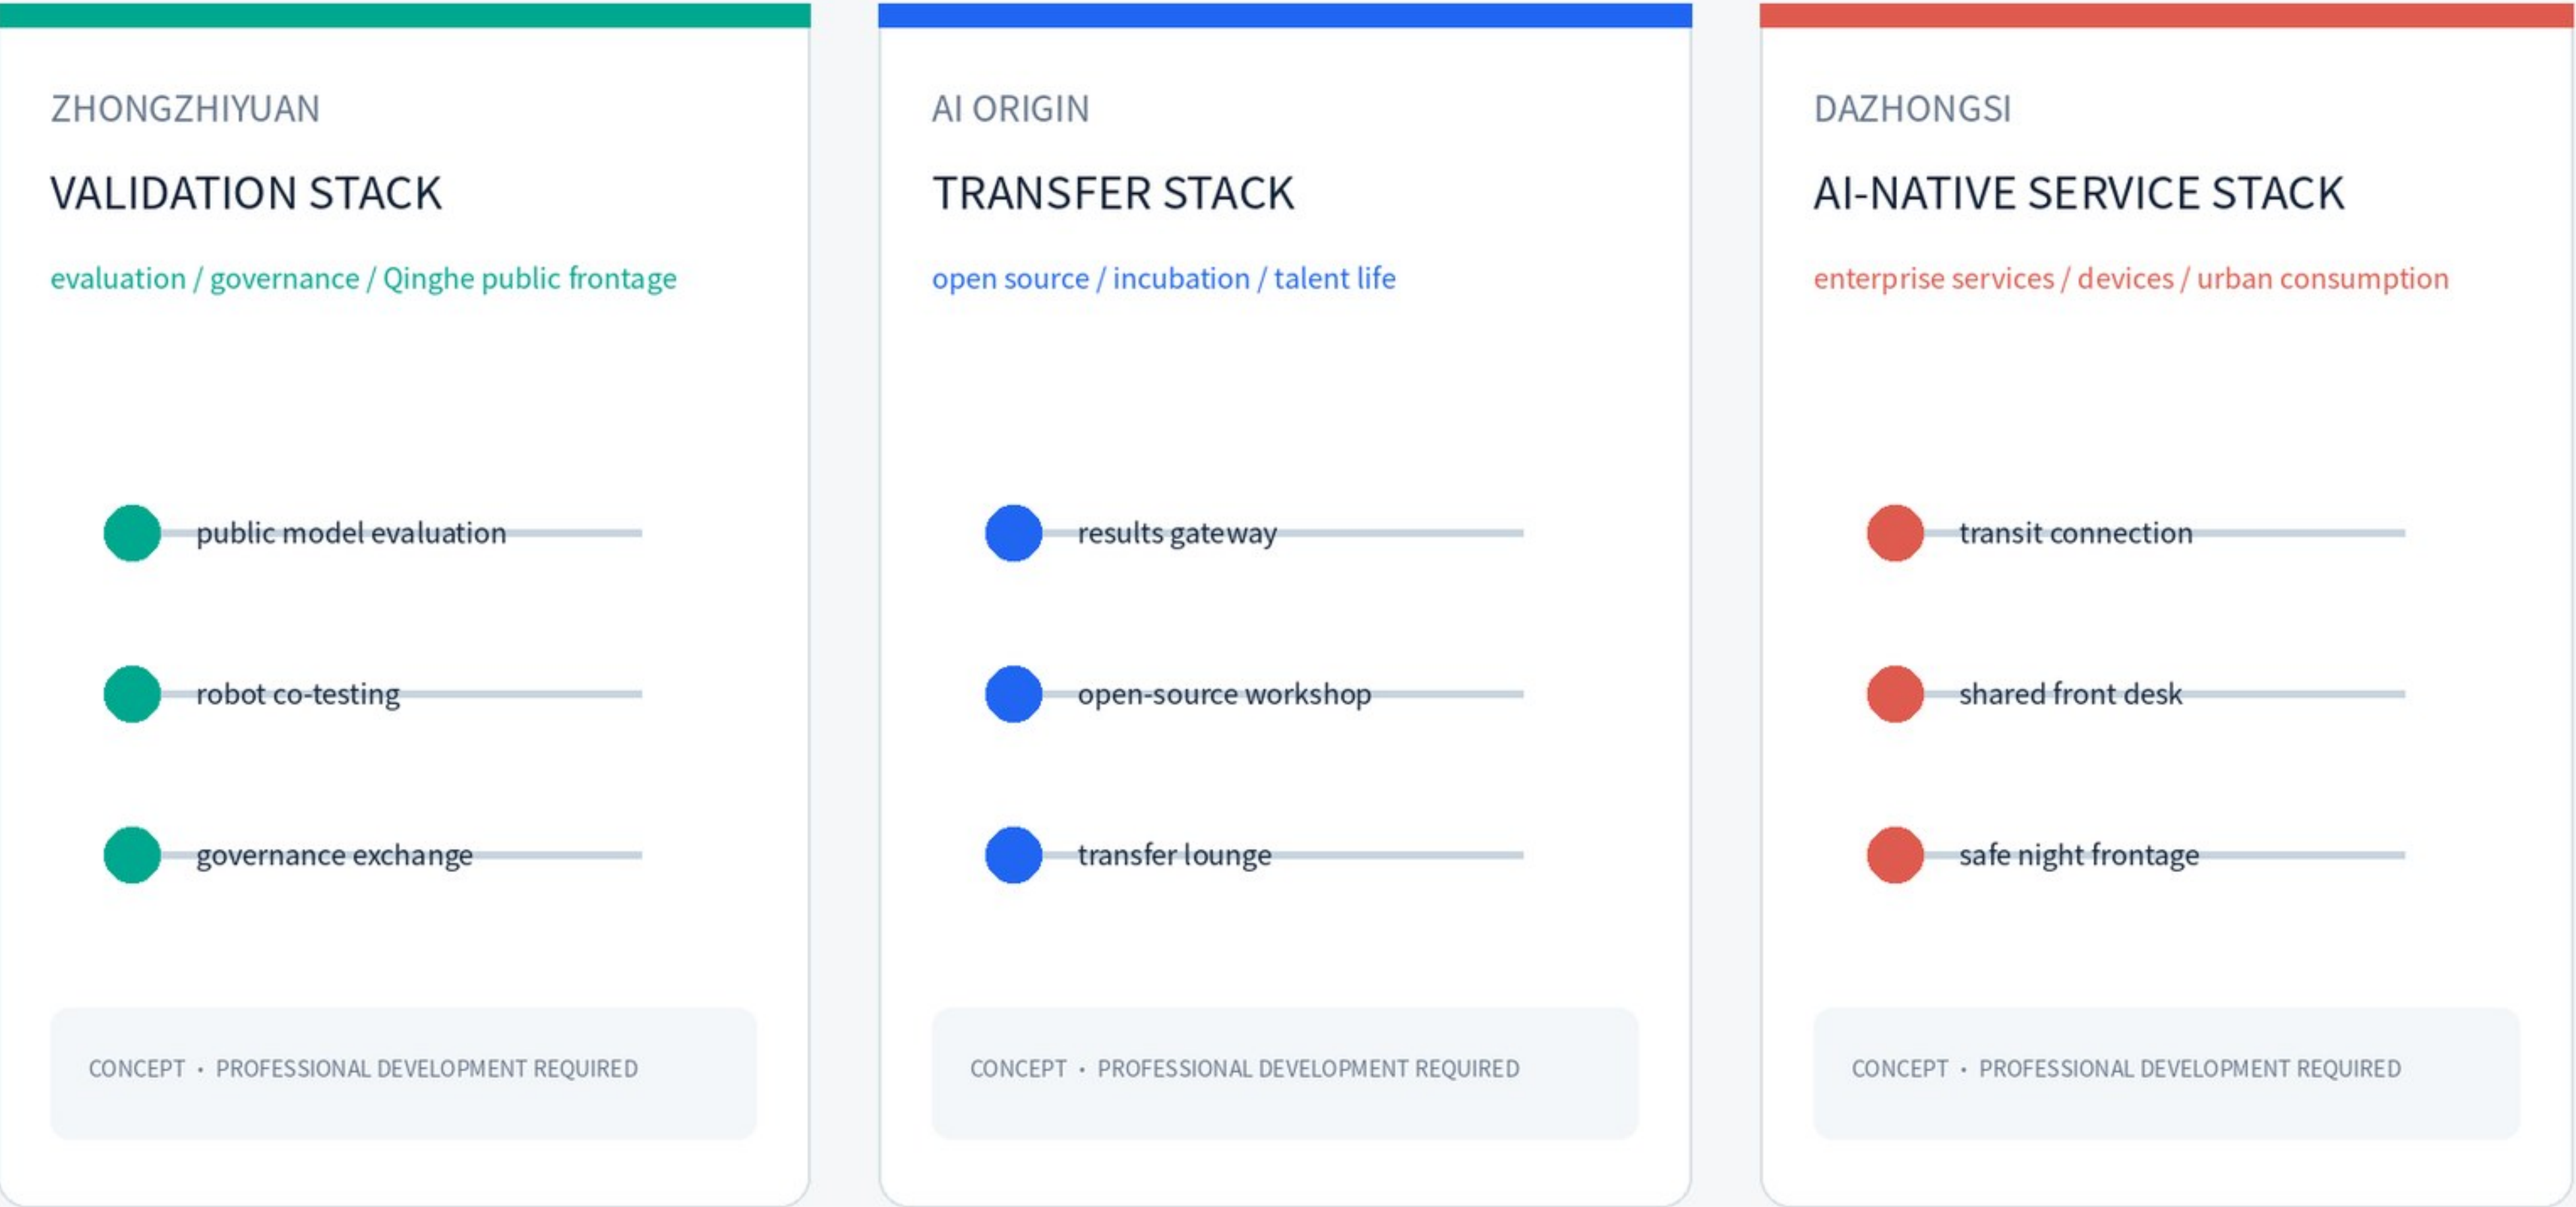

Provisional polygons stay low-contrast; official data triggers complete recalculation and redraw.

THREE STACKS

THREE STACKS FORM ONE INNOVATION CHAIN

JZ • OS

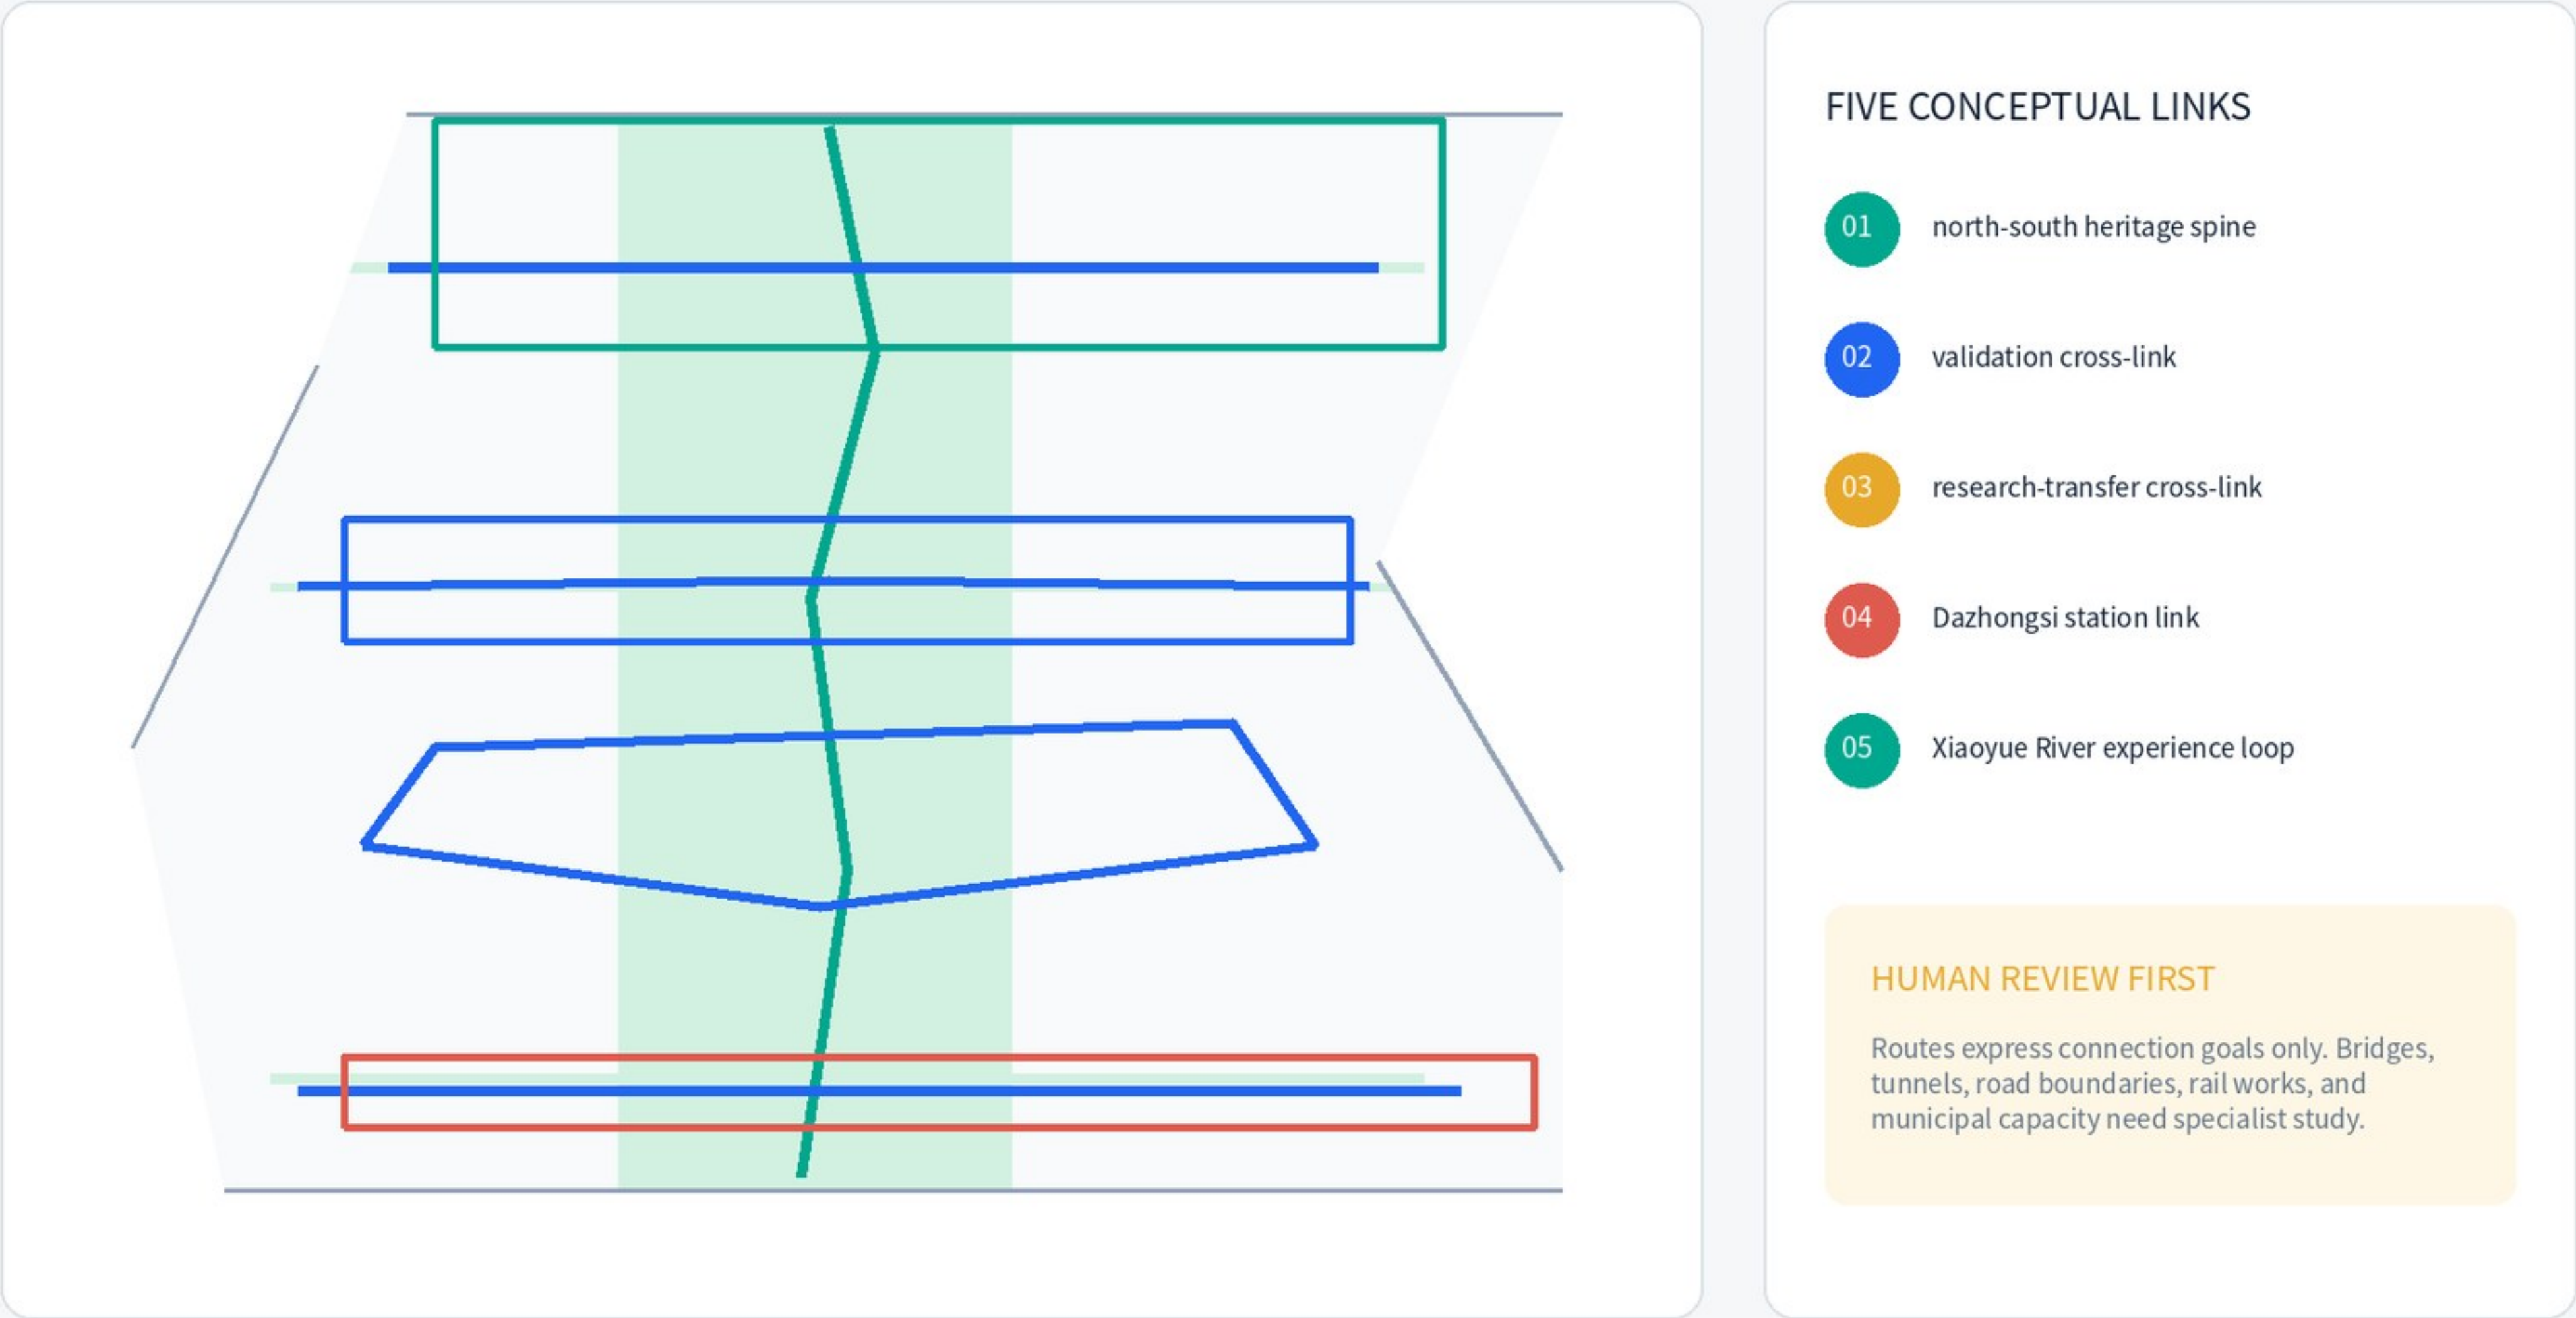

PROVISIONAL CONCEPT • FOR OPEN CALL, SELF-CHECK, AND DESIGN DISCUSSION ONLY

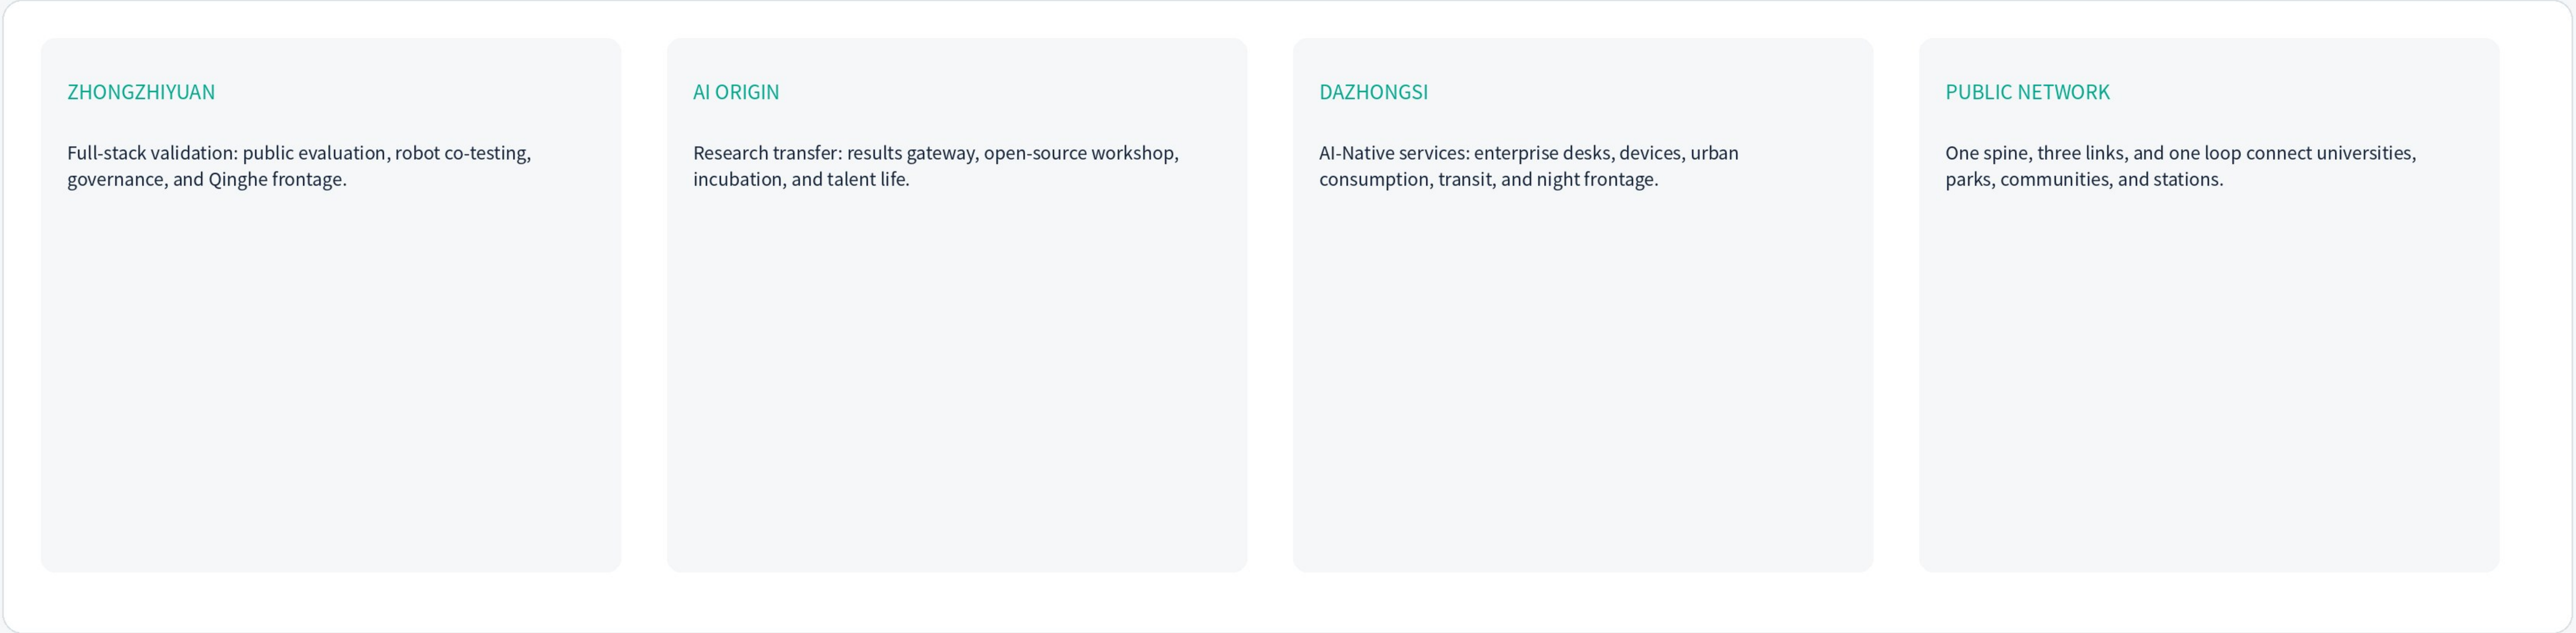

MOBILITY + BLUE-GREEN

MOBILITY, BLUE-GREEN SPACE, AND AI SCENARIOS AS ONE PUBLIC NETWORK

JZ • OS

12 SCENARIOS

Three industry TVS cards plus nine public and enterprise services pass four governance gates.

4 LANDMARKS

Interface Station, Evaluation Field, Origin Plaza, and City Merge Table record revisable knowledge.

9 ACTION PACKAGES

Near-term reversible interfaces, medium-term scenario network, and long-term specialist study.

SELF-CHECK + RISK

Four machine gates must pass; official boundaries, controls, ownership, utilities, and surveys remain pending.
