

An AI urban spine open to co-programming

JINGZHANG OPEN STACK

ONE SPINE • THREE STACKS • TWO WINGS • TWELVE INTERFACES

JZ • OS

OPEN CITY STACK

A city is not a one-time product. It is a set of public interfaces that can be reviewed, rolled back, and maintained together.

01

heritage + mobility spine

03

differentiated stacks

02

resource + scenario wings

12

human-reviewable interfaces

PROVISIONAL CONCEPT • FOR OPEN CALL, SELF-CHECK, AND DESIGN DISCUSSION ONLY

01

A century ago railway standards organized cooperation. Today open interfaces, public testing, Human Review, and version records organize public innovation.

Design judgment

Use open interfaces to organize innovation rather than a closed AI campus.

Spatial evidence

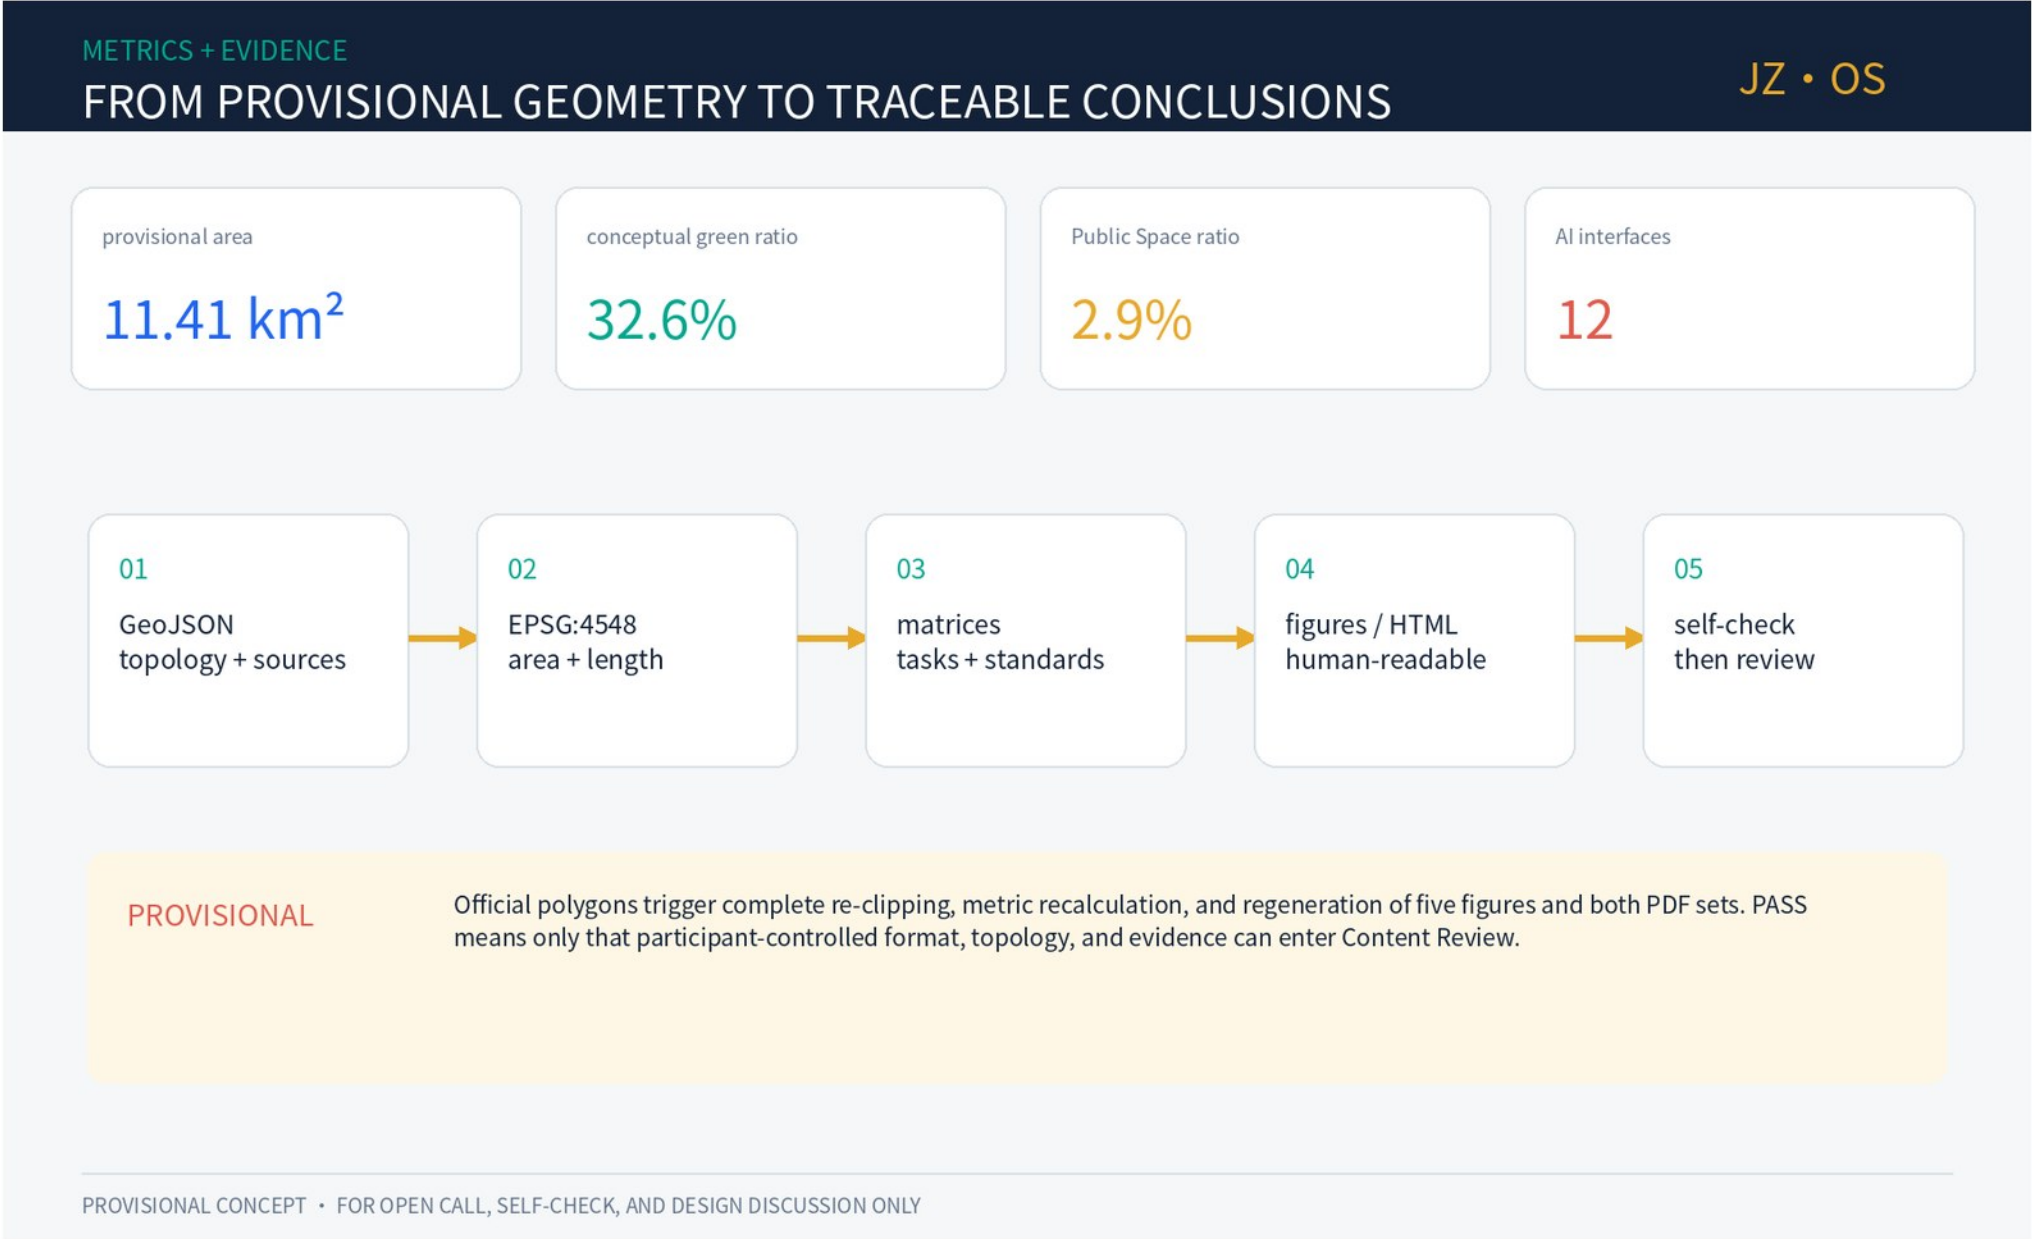

One heritage and mobility spine connects three differentiated innovation stacks.

Public boundary

Every AI interface can be exited, stopped, and reviewed by people.

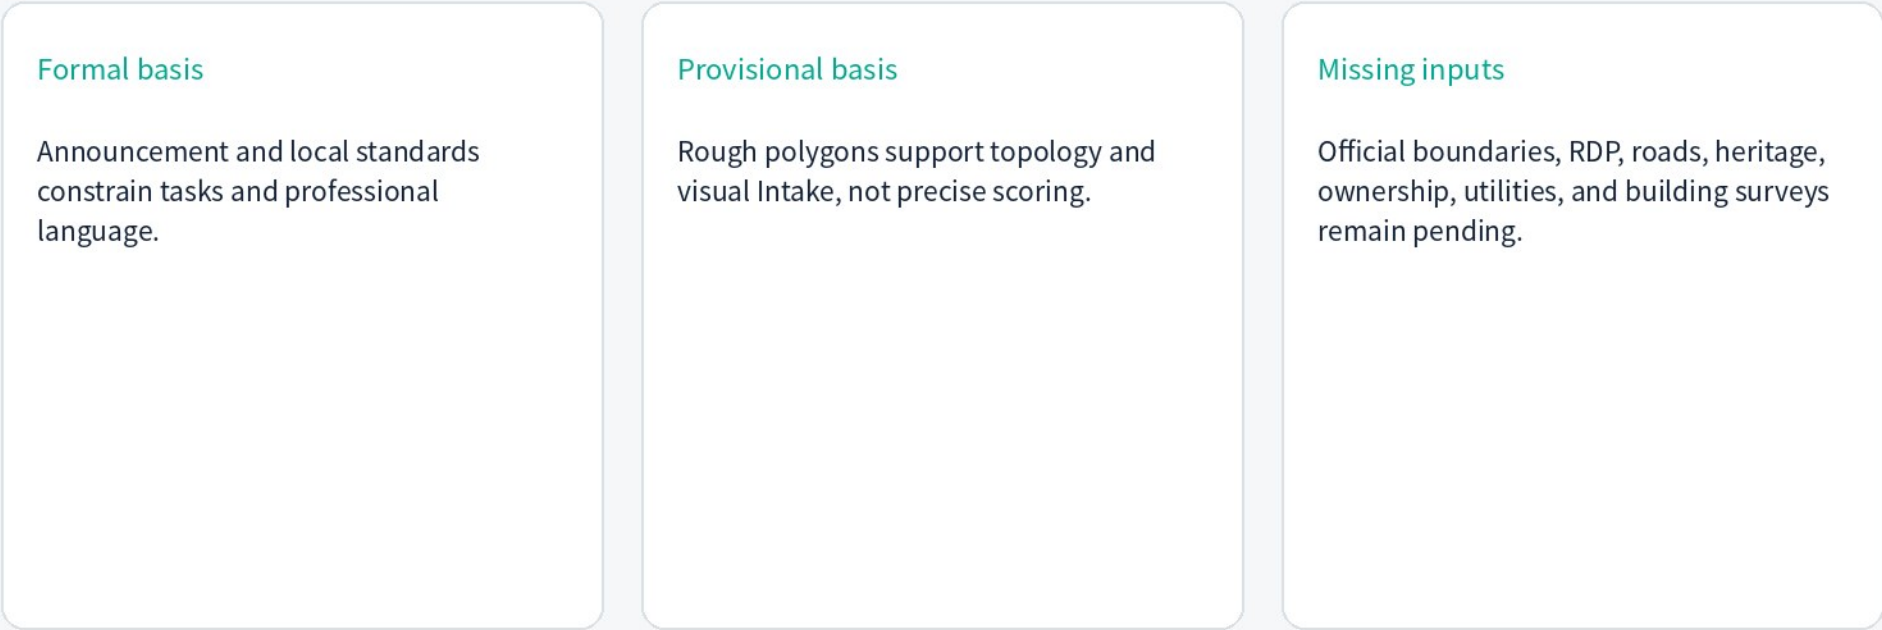

CONCEPTUAL RECOMMENDATION • PROFESSIONAL REVIEW REQUIRED

Provisional geometry is not an Official Planning Boundary

02

The announcement confirms tasks and approximate areas. Repository provisional polygons support generation, self-check, and presentation only.

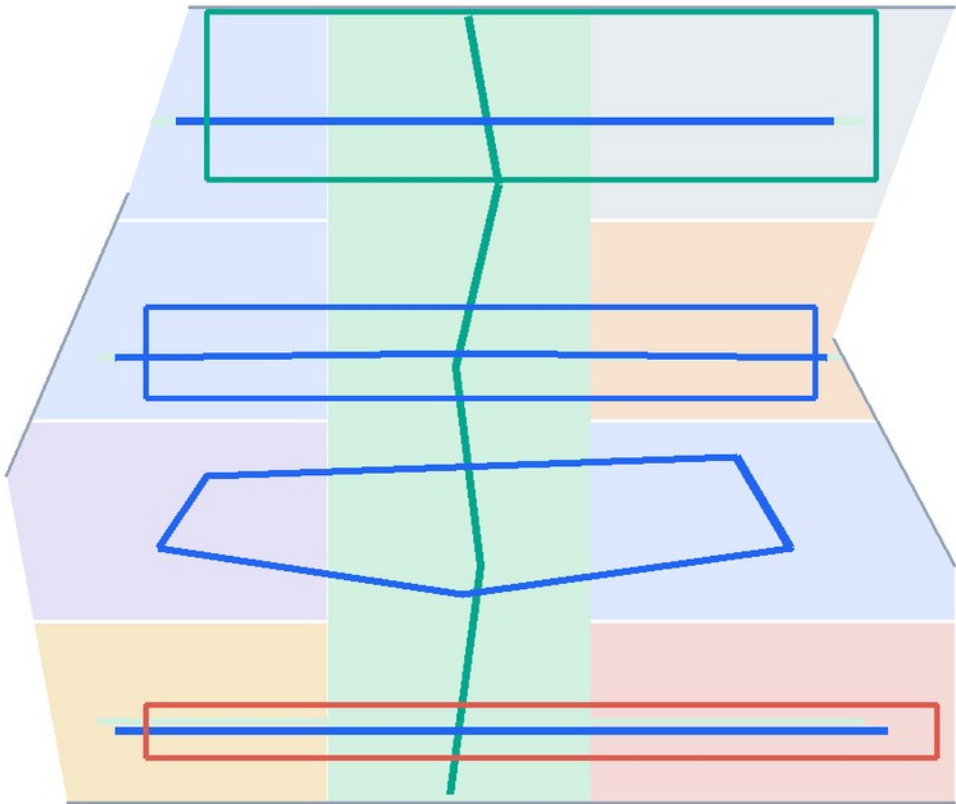

CONCEPTUAL RECOMMENDATION • PROFESSIONAL REVIEW REQUIRED

From industry strategy to key-area prototypes

STRUCTURE / LAND USE

THREE-LEVEL SCOPE AND OPEN URBAN STACK

JZ • OS

43.6 km²

Coordinated Research Area

industry + regional coordination

11.4 km²

Overall Design Area

space + Urban Renewal

368.4 ha

Key-Area Design

three-stack prototypes

FUNCTIONAL GRADIENT

- RESEARCH
- TRANSFER
- SERVICE
- LIVING

PROVISIONAL CONCEPT • FOR OPEN CALL, SELF-CHECK, AND DESIGN DISCUSSION ONLY

03

The 43.6 km² research layer, 11.4 km² design layer, and 368.4 ha key-area layer transmit decisions without converting concepts into statutory planning.

Research area

Industry ecosystem, regional coordination, and future-city mechanisms.

Overall design

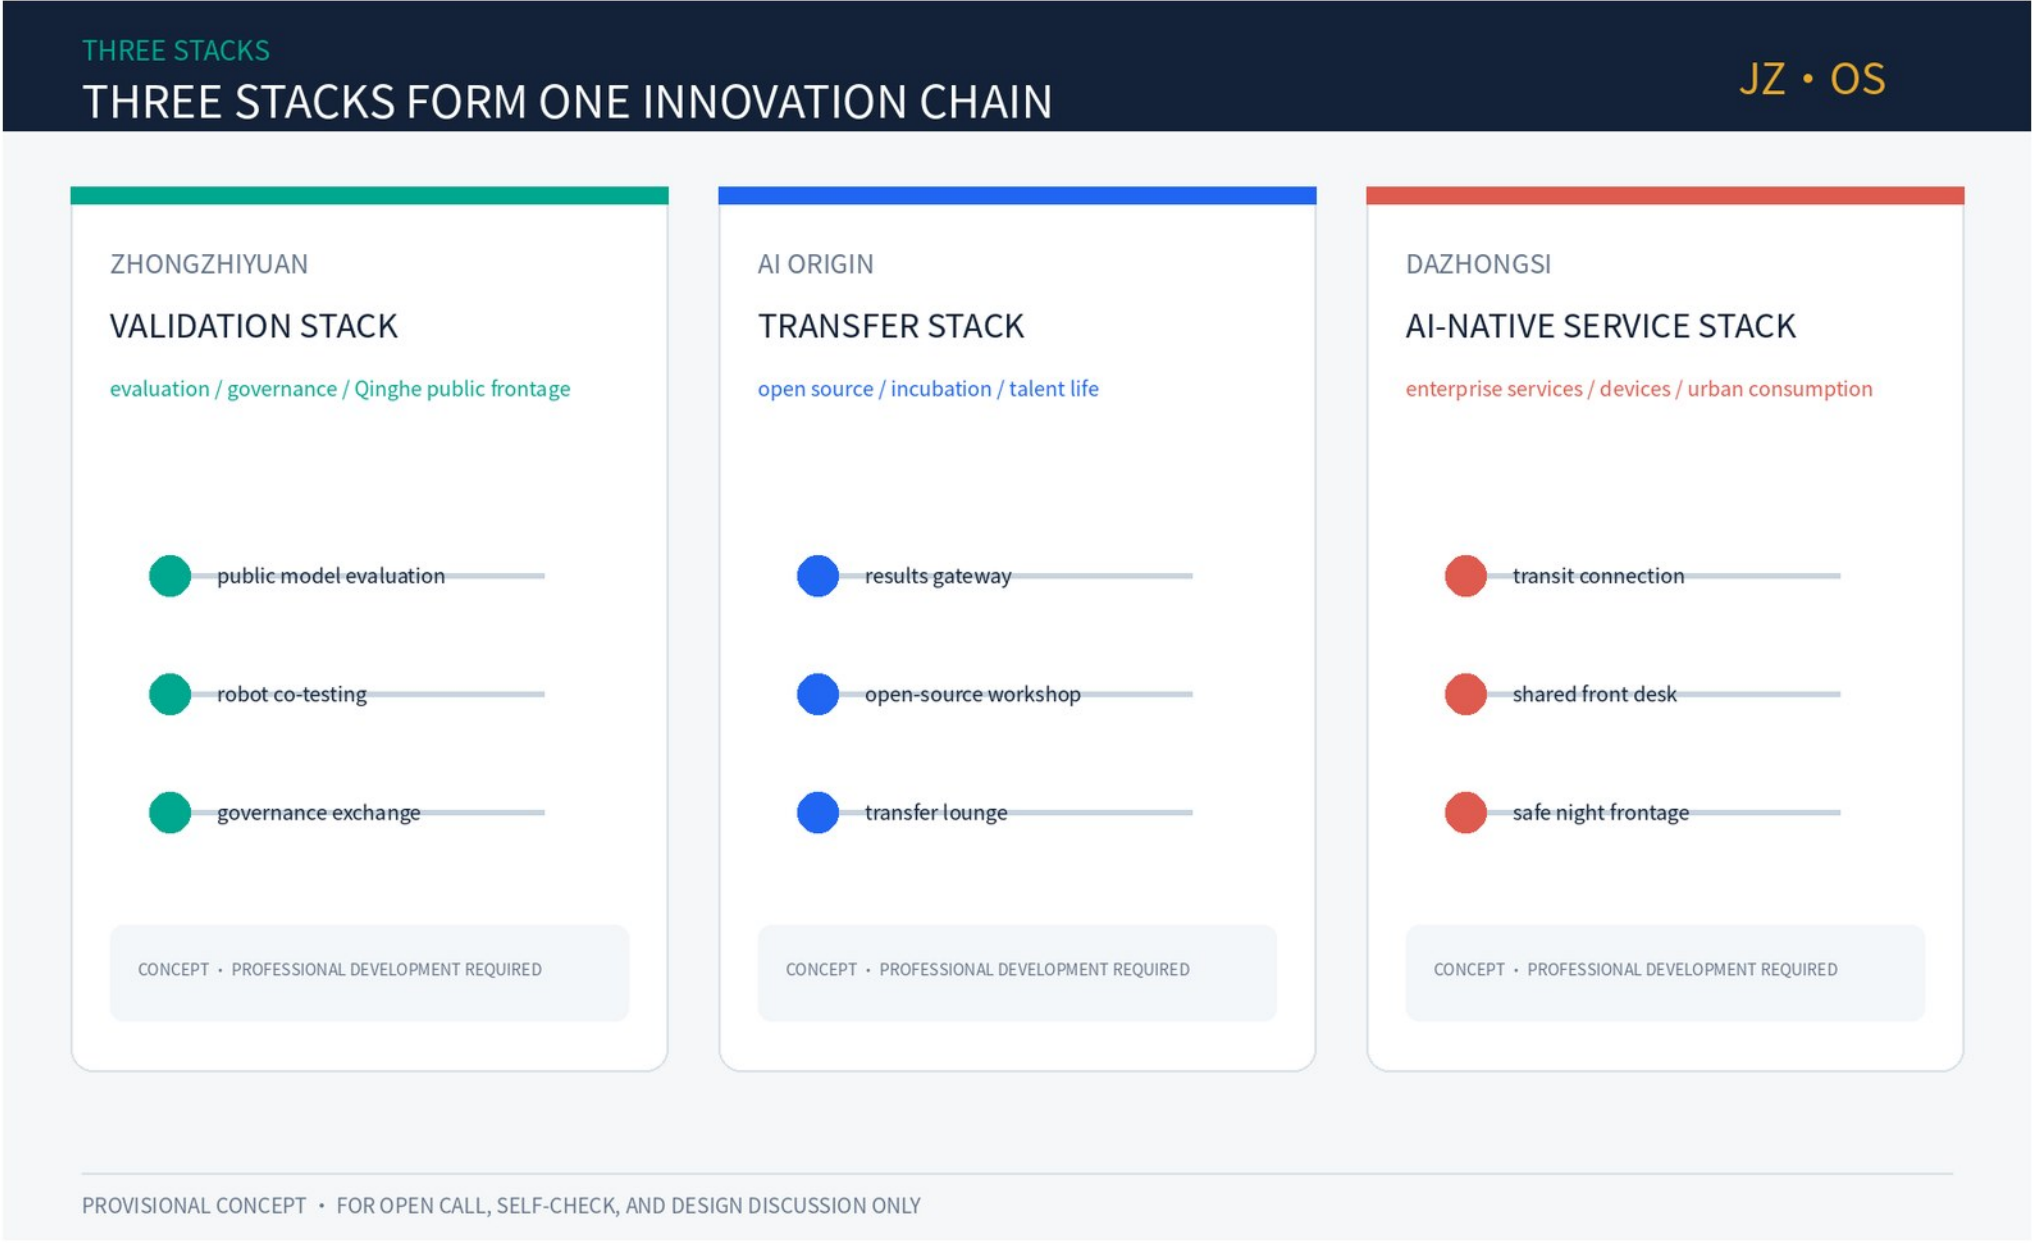

Spatial structure, Urban Renewal, mobility, infrastructure, and Public Space.

Key areas

Validation, research-transfer, and AI-Native service prototypes.

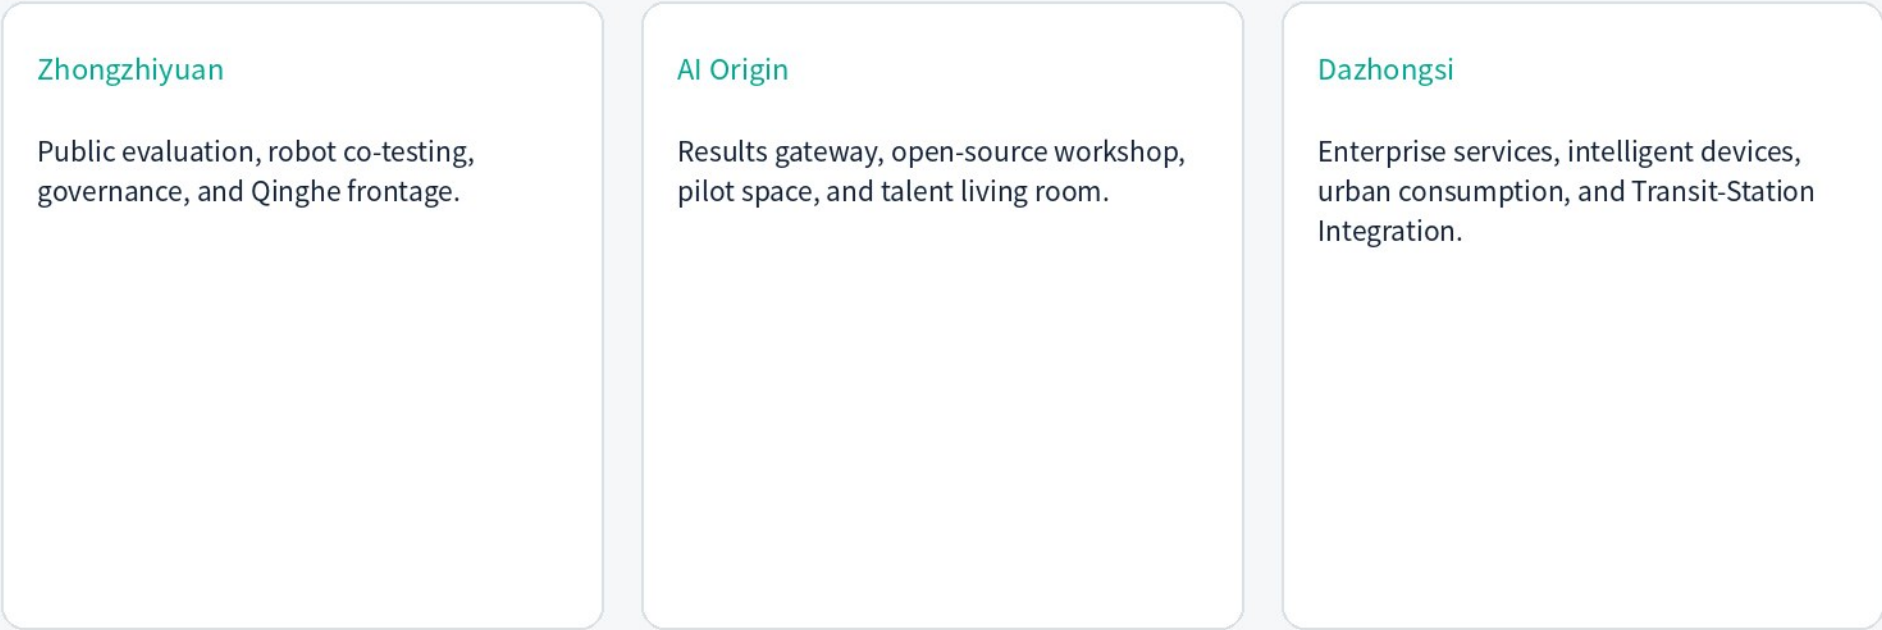

CONCEPTUAL RECOMMENDATION • PROFESSIONAL REVIEW REQUIRED

Validation, transfer, and services form one innovation chain

04

Zhongzhiyuan evaluates, AI Origin transfers research, and Dazhongsi connects enterprise services and public experience.

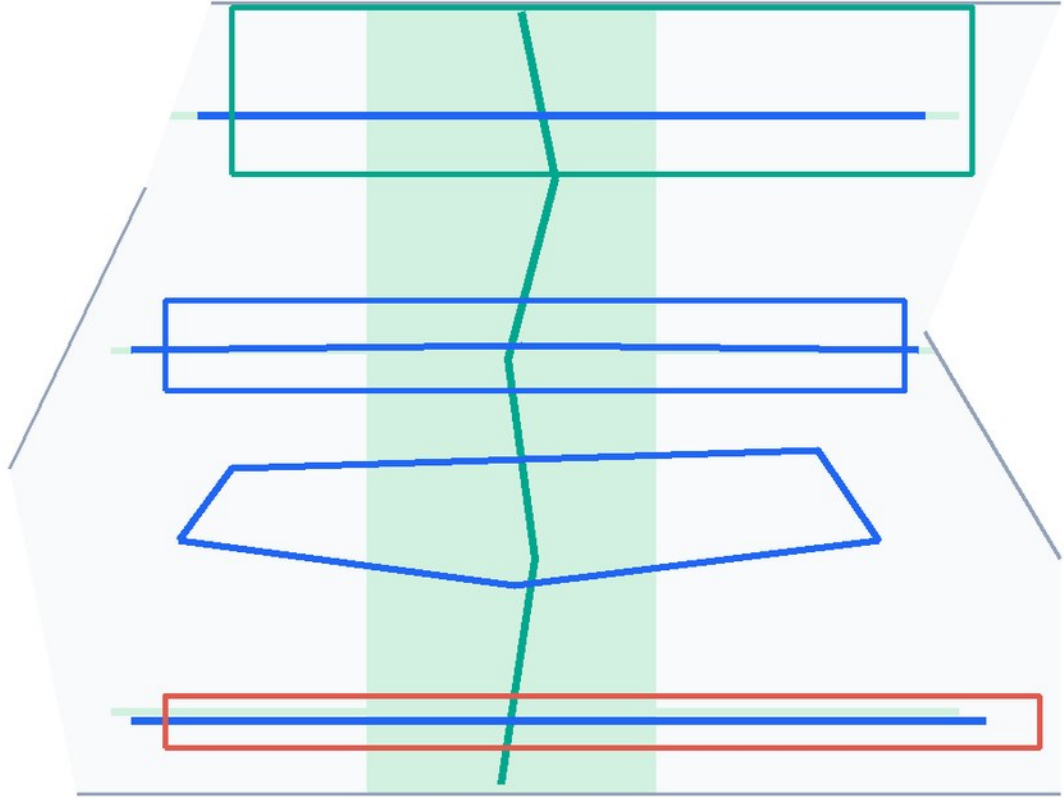

CONCEPTUAL RECOMMENDATION • PROFESSIONAL REVIEW REQUIRED

One spine, three links, and one experience loop

MOBILITY + BLUE-GREEN

MOBILITY, BLUE-GREEN SPACE, AND AI SCENARIOS AS ONE PUBLIC NETWORK

JZ • OS

FIVE CONCEPTUAL LINKS

01

north-south heritage spine

02

validation cross-link

03

research-transfer cross-link

04

Dazhongsi station link

05

Xiaoyue River experience loop

HUMAN REVIEW FIRST

Routes express connection goals only. Bridges, tunnels, road boundaries, rail works, and municipal capacity need specialist study.

PROVISIONAL CONCEPT • FOR OPEN CALL, SELF-CHECK, AND DESIGN DISCUSSION ONLY

05

Co-test walking barriers, accessibility, and transfers before professional teams develop any engineering solution.

North-south

The heritage green spine links railway memory and public validation nodes.

East-west

Three links connect universities, parks, communities, and transit stations.

Engineering boundary

Alignments are connection goals; bridges, tunnels, and road boundaries require specialist study.

CONCEPTUAL RECOMMENDATION • PROFESSIONAL REVIEW REQUIRED

Every scenario must be stoppable and human-reviewable

JINGZHANG OPEN STACK

ONE SPINE • THREE STACKS • TWO WINGS • TWELVE INTERFACES

JZ • OS

OPEN CITY STACK

A city is not a one-time product. It is a set of public interfaces that can be reviewed, rolled back, and maintained together.

01

heritage + mobility spine

03

differentiated stacks

02

resource + scenario wings

12

human-reviewable interfaces

PROVISIONAL CONCEPT • FOR OPEN CALL, SELF-CHECK, AND DESIGN DISCUSSION ONLY

06

Three industry TVS cards and nine public or enterprise service cards pass entry, data, operation, and exit gates.

Industry testing

Model evaluation, low-speed robot co-testing, and edge-compute sandbox.

Public services

Mobility, health, education, culture, language, accessibility, and review.

Four gates

Entry, data, operation, and exit each record responsibility and stop conditions.

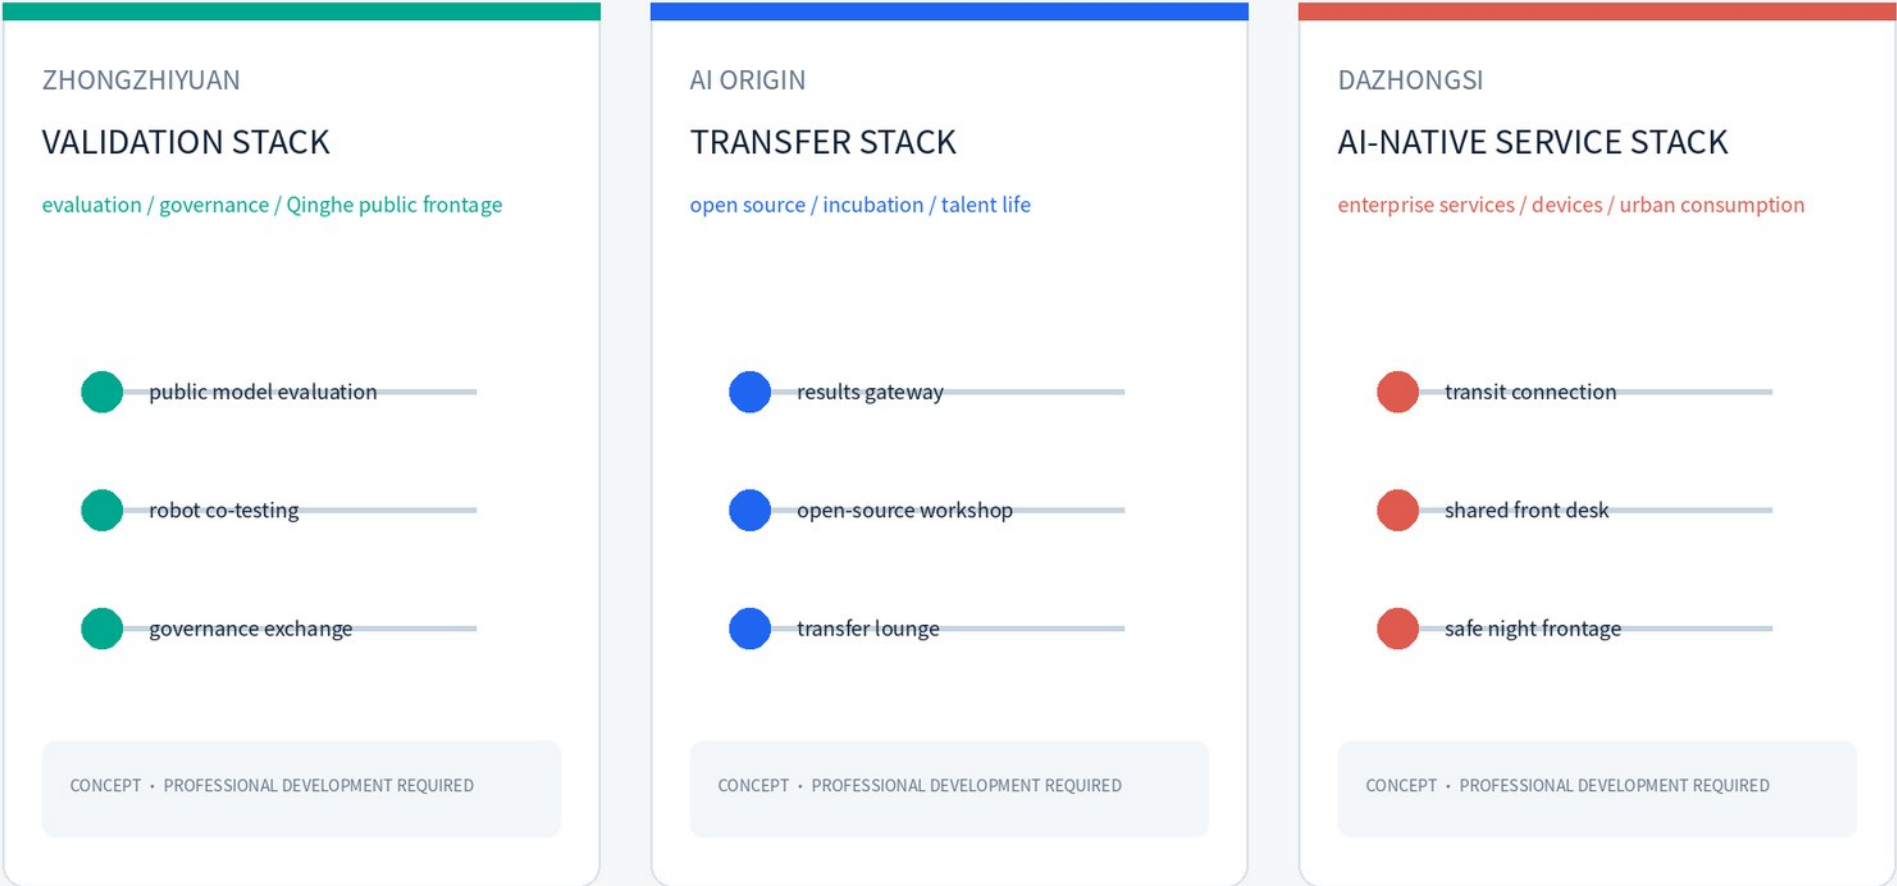

CONCEPTUAL RECOMMENDATION • PROFESSIONAL REVIEW REQUIRED

Commemorate knowledge that can be updated

THREE STACKS

THREE STACKS FORM ONE INNOVATION CHAIN

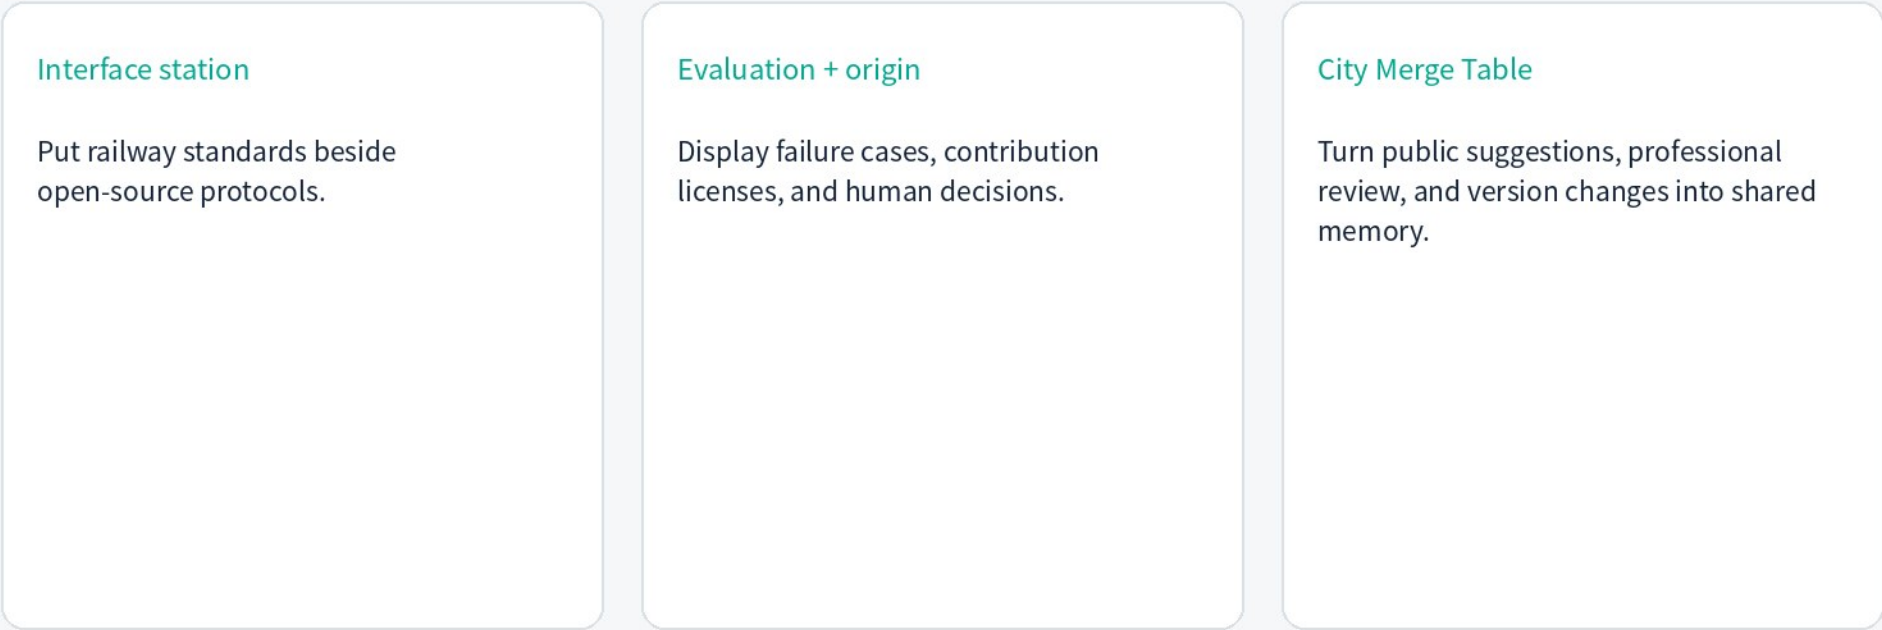

JZ • OS

PROVISIONAL CONCEPT • FOR OPEN CALL, SELF-CHECK, AND DESIGN DISCUSSION ONLY

07

The Centennial Interface Station, Public Model Evaluation Field, Open-Source Origin Plaza, and City Merge Table record contribution and review.

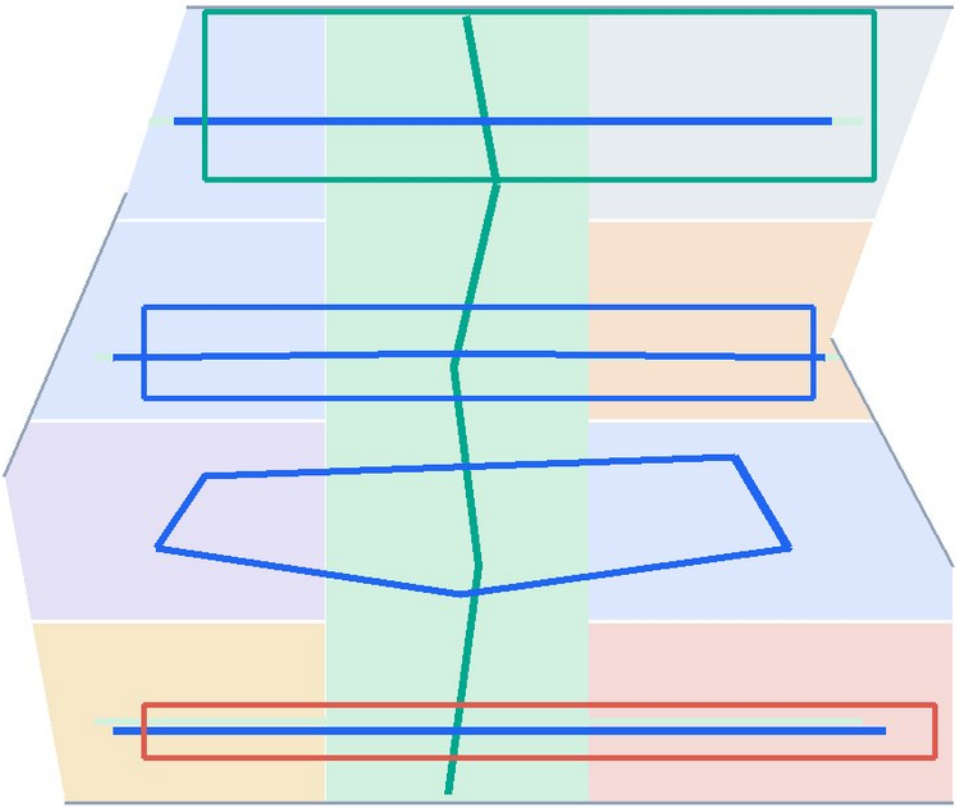

CONCEPTUAL RECOMMENDATION • PROFESSIONAL REVIEW REQUIRED

Operations before space; reversible before permanent

STRUCTURE / LAND USE

THREE-LEVEL SCOPE AND OPEN URBAN STACK

JZ • OS

43.6 km²
Coordinated Research Area
industry + regional coordination

11.4 km²
Overall Design Area
space + Urban Renewal

368.4 ha
Key-Area Design
three-stack prototypes

FUNCTIONAL GRADIENT

- RESEARCH
- TRANSFER
- SERVICE
- LIVING

PROVISIONAL CONCEPT • FOR OPEN CALL, SELF-CHECK, AND DESIGN DISCUSSION ONLY

08 Nine action packages move from open interfaces, to a scenario network, to specialist study for fixed construction.

Near term

Data ledger, interpretation, walking co-tests, and movable interfaces.

Medium term

Transfer lounges, shared front desks, and controlled sandboxes.

Long term

Fixed evaluation and international-exchange spaces enter specialist analysis.

CONCEPTUAL RECOMMENDATION • PROFESSIONAL REVIEW REQUIRED

GeoJSON -> metrics -> matrices -> visual outputs

METRICS + EVIDENCE

FROM PROVISIONAL GEOMETRY TO TRACEABLE CONCLUSIONS

JZ • OS

provisional area

11.41 km²

conceptual green ratio

32.6%

Public Space ratio

2.9%

AI interfaces

12

01

GeoJSON
topology + sources

02

EPSG:4548
area + length

03

matrices
tasks + standards

04

figures / HTML
human-readable

05

self-check
then review

PROVISIONAL

Official polygons trigger complete re-clipping, metric recalculation, and regeneration of five figures and both PDF sets. PASS means only that participant-controlled format, topology, and evidence can enter Content Review.

PROVISIONAL CONCEPT • FOR OPEN CALL, SELF-CHECK, AND DESIGN DISCUSSION ONLY

09

Machine recalculation and human reading cross-check each other. FAR, height, BCR, and total floor area remain pending official data.

Recalculable

Boundary, green space, Public Space, conceptual footprints, and link length.

Keep pending

Statutory intensity, construction scale, investment, approvals, and feasibility.

Four gates

Deterministic, spatial, visual, and professional evidence checks must all pass.

CONCEPTUAL RECOMMENDATION • PROFESSIONAL REVIEW REQUIRED

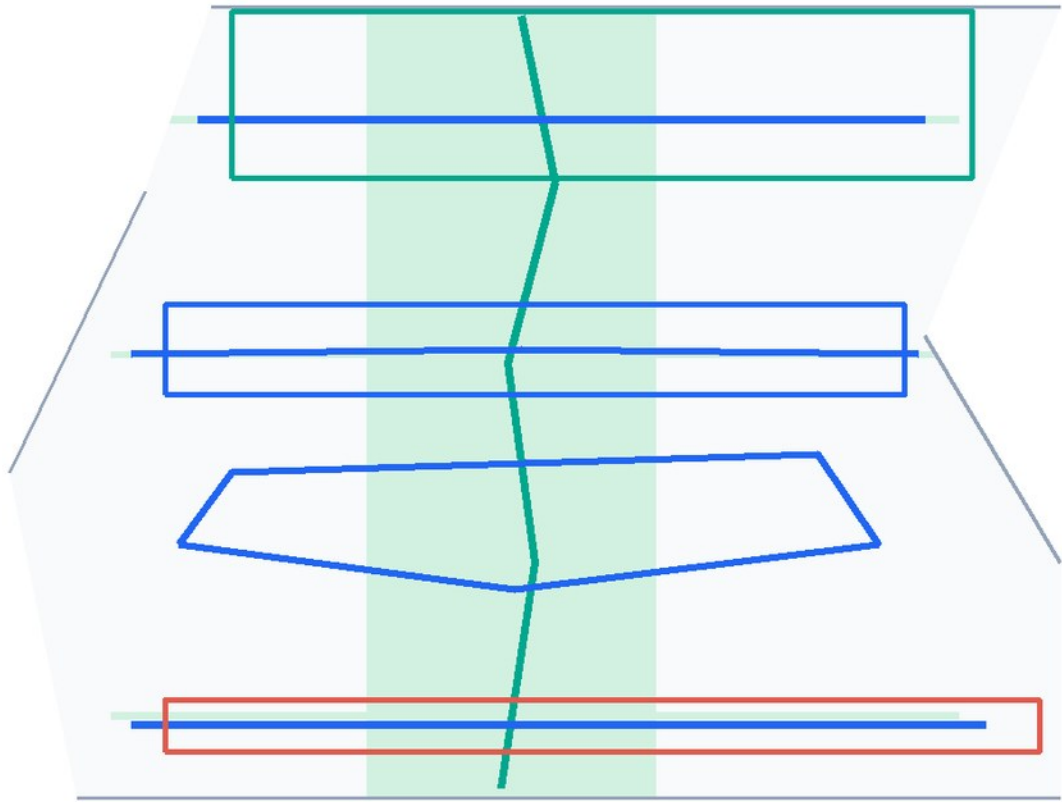

9/10

Turn the Open Call into an urban maintenance mechanism

MOBILITY + BLUE-GREEN

MOBILITY, BLUE-GREEN SPACE, AND AI SCENARIOS AS ONE PUBLIC NETWORK

JZ • OS

FIVE CONCEPTUAL LINKS

- 01 north-south heritage spine
- 02 validation cross-link
- 03 research-transfer cross-link
- 04 Dazhongsi station link
- 05 Xiaoyue River experience loop

HUMAN REVIEW FIRST

Routes express connection goals only. Bridges, tunnels, road boundaries, rail works, and municipal capacity need specialist study.

PROVISIONAL CONCEPT • FOR OPEN CALL, SELF-CHECK, AND DESIGN DISCUSSION ONLY

10

Spring maintenance, summer testing, autumn Open Stack conference, and winter public review accumulate public knowledge through issues, versions, and licenses.

Annual rhythm

Maintenance, testing, conference, review, and version release.

Community mechanism

Rotating maintainers, open issues, quarterly demos, and contribution licenses.

Brand asset

Reusable protocols, cases, and public evaluation create international value.

CONCEPTUAL RECOMMENDATION • PROFESSIONAL REVIEW REQUIRED
